Safety Information

This section contains important information on safe and efficient operation. Please read this information before using the device.

• Use only the batteries and power adapter provided by the manufacturer. Use of unauthorized accessories may void your warranty.
• Do not remove the battery while the phone is charging.
• Avoid using the phone near electromagnetic sources such as TVs, radios, and microwave ovens.
• Unplug the power adapter from the wall outlet during lightning storms to avoid electric shock or fire.
• Do not expose the phone or the battery to direct sunlight.
• Do not store your phone in temperatures higher than 60ºC or 140ºF.
• Do not use harsh chemicals or detergents to clean your phone.
• Do not handle the phone with wet hands while it is being charged. This may cause an electric shock or serious damage to the phone.

SAFETY PRECAUTIONS FOR BATTERY USE
• Use only approved battery.
• Keep the battery dry and away from any liquid since this may cause a short circuit.
• Keep the battery away from metal objects since this may cause a short circuit.
• Do not use damaged or deformed batteries.
• If the battery emits a foul odor, discontinue use.
• Keep the battery away from babies and small children.
• If the battery leaks:
    • Do not allow the leaking fluid to come in contact with your skin, eyes or clothing. If already in contact, rinse with clean water immediately and seek medical advice.
    • Keep the battery away from fire since this may cause the battery to explode.
    • Do not attempt to open or service the battery yourself.
    • Do not dispose battery in fire or water.
    • Recycle or dispose used batteries according to the local regulations.
• Prevent to place the battery in extreme temperature condition, it maybe influence the battery efficiency.

ROAD AND ENVIRONMENTAL SAFETY
• Turn off the phone in areas with a potentially explosive atmosphere or where flammable objects exist such as gas stations, fuel depots, and chemical plants among others. Sparks from these areas could cause explosion or fire and result in injury or even death.
• Do not use hand-held phones while driving a vehicle. Use hands-free devices as an alternative.

SAFETY IN AIRCRAFT
Do not use the phone on board an aircraft. The phone's network signals may cause interference to the

navigation system. As a safety measurement, it is against the law in most countries to use the phone on board an aircraft.

SAR Information
THIS MOBILE DEVICE MEETS GUIDELINES FOR EXPOSURE TO RADIO WAVES. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health. The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2 W/kg averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 0.808 W/kg. Use of device accessories and enhancements may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information can be found on the Cellular Telecommunications Industry Association (CTIA) website at www.wow-com.com.
- The standard value of SAR is 2.0W/Kg; the maximum SAR of the device is 0.808W/Kg.
- For decreasing the influence of the electromagnetic wave, please use the device carefully.

FCC Notice
Your device may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate this equipment.

WEEE Notice
The WEEE logo on the product or on its box indicates that this product must not be disposed of or dumped with your other household waste. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling of such hazardous waste. Isolated collection and proper recovery of your electronic and electrical waste equipment at the time of disposal will allow us to help

conserve natural resources. Moreover, proper recycling of the electronic and electrical waste equipment will ensure safety of human health and environment. For more information about electronic and electrical waste equipment disposal, recovery, and collection points, please contact your local city center, household waste disposal service, shop from where you purchased the equipment, or manufacturer of the equipment.

RoHS Compliance
This product is in compliance with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments.

European Union Regulatory Conformance
The equipment complies with the RF Exposure Requirement 1999/519/EC, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0–300 GHz). This equipment meets the following conformance standards: EN 300 328, EN 301489-1, EN 301489-3, EN 301489-7, EN 301489-17, EN 301489-24, EN 301 511, EN 301 908-1/2, EN 50360, EN62311, EN 300440, and EN 60950. Changes or modifications to this product not authorized by the manufacturer could void the EMC compliance and negate your authority to operate the product. This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices. We, hereby, declare that this cellular, Wi-Fi, & Bluetooth radio is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Intellectual Property Right Information
Right to all technologies and products that comprise this device are the property of their respective owners:
This product has an Android platform based on Linux, which can be expanded by a variety of
Java-Script-based application SW. Google, the Google logo, Android, the Android logo, Gmail, and YouTube are trademarks of Google Inc. Bluetooth and the Bluetooth logo are trademarks owned by Bluetooth SIG, Inc.
Wi-Fi, the Wi-Fi CERTIFIED log, and the Wi-Fi logo are registered trademarks of the Wireless Fidelity Alliance.

General Information

This section contains important information on safe and efficient operation. Please read this information before using the device. Ignorance of the following notices may lead to violations of the law.

- Before using the device, please make sure you have fully charged the battery.
- Do NOT remove the battery from the device during charging.
- Before inserting SIM card into the device, make sure that the device is switched off.
- Do NOT attempt to dissemble the device on your own. This should be done by an authorized person.
- Use the device in accordance to instructions when in public facilities.
- In some countries, it is a violation against the law to record phone conversations. Always ask permission of the other party when you are going to record a conversation.
- To protect your ears, turn down the volume before you use stereo headsets or other audio devices.
- To avoid damaging the touch screen and the device, do NOT apply excessive pressure on them, and remove the device from your pants' pocket before you sit down. It is also recommended that you only use the stylus or your finger to interact with the touch screen. It is not covered by the warranty that you crack the touch screen because of the improper usage.
- When you use the device for a long time, such as talking on the phone, browsing online, or charging the battery, the device may become warm. In most cases, this condition is normal.
- Refer servicing to the provider, or an authorized technician under the following conditions: 1. The device has been damaged. 2. When you follow the instructions to use your device, it does not operate normally. 3. The device has been exposed to water. 4. Liquid has been spilled or an object has fallen onto the device.
- Do Not push unauthorized objects into slots and openings in your device.
- The device should be placed away from heat sources such as stoves, radiators, heat registers, or other products that produce heat.
- Condensation may form on or within your device, when you move your device between environments with very different temperature and/or humidity ranges. To avoid damaging your device, make the moisture to evaporate before you use the device.
- To avoid damaging your device, do Not put your device on an unstable table, stand, bracket, or other places.
- Before you clean your device, unplug it, please. Use a damp cloth for cleaning, but do Not use water, liquid cleaners, or aerosol cleaners to clean the touch screen.

Table of Contents

1. Getting Started

1.1 Your Phone

This section introduces you to the hardware of the device.
| No.	Items	Functions
1	**Earphone jack**	Use a headset for hands-free conversation or listening to music.
2	**Power**	• Press and hold for several seconds to turn the phone on or off. • To save battery, quick press to temporarily turn the screen on or off.

13	**Strap hole**	It is for hanging cell phone strap.
14	**Micro USB port**	• Connect USB cable to PC as a modem / USB mass storage. • Connect USB cable and the AC adapter to charge the battery.
15	**Volume**	Press upwards or downwards to increase or decrease the volume. Slide down the key fully to enter vibrate mode.
16	**Micro SD Slot**	You can insert your Micro SD card here.
17	**Camera key**	In Camera/Camcorder mode, press to take a photo or video.
No.	Items	Functions
18	**Speaker**	The source of music and voice.
19	**Flash LED**	Help photo shooting.
20	**3Megapixels Camera**	The camera on the back of the device supports 3-mega-pixel photo and high-quality video.
21	**Back cover**	You need to open the cover to install or uninstall the battery and SIM card.

**NOTE: The battery can also be charged while connecting to a computer.**

1.2 Installing or uninstalling the SIM Card, Battery, and Memory Card

To remove the back cover

1. Please turn over your phone with the back cover facing up.
2. Please move your fingertip into the slot located on the top of the back cover.

3. Stay your palm close to the back cover. Then pull the back cover with your fingertip to remove it.
SIM card

The SIM card contains your phone number, memory storage, and network service details.

To install the SIM card

Insert the SIM card. Make sure the gold contacts are facing down and the cut-off corner is facing towards the battery slot. There are two slots for two SIM cards. Upper slot is for SIM2, SIM1slot is on the underside.

To remove the SIM card
1. Remove battery.
2. Use your finger to slide the SIM card from the card slot.

Battery

Your phone comes with a rechargeable LI-Polymer battery. Battery life varies depending on the network, used applications, and the type of connections attached to your phone.
To install the battery

Insert the battery. Make sure the contacts of the battery are aligned with the connectors on the battery slot.
To remove the battery
Use your fingertip to lift the battery, and then, remove it.

NOTE: To ensure battery performance and avoid the risk of fire:
• Use only original batteries designated for the phone.
**• Do not store the battery in temperatures below -10ºC or higher than 45ºC**

To replace the back cover
Secure the hooks on the back cover with designated holes on the phone and close the back cover.

1. Please insert the hook on the bottom of the back cover into the slot of the phone.
2. With your right and left thumbs, press the middle of the back cover.

3. Then, press the top of the back cover until click in place.

Memory card
You will need a microSD card to store photos, music, videos, and other data.

To install the memory card
1. Insert the memory card with the gold contacts facing down.
2. Push the memory card until it clicks into place.

To remove the memory card
Push the memory card down to eject it from the slot.
1.3 Charging the Battery
When you take your phone out from the box for the first time, the battery is only partially charge, to fully charge the battery before use.
1. Plug the battery charger.
2. Plug the AC adapter to an outlet to start charging.
NOTE:
• **The battery can also be charged when you connect your phone to the computer.**
• **To ensure safety, do not remove the battery from the phone while the AC adapter is connected or while it is being charged.**

1 Getting Started

headset	the button to end the call. • When you are listening to music press and hold the button back to Playlist. • When you use other functions, press and hold the button can launch the music player. • When you receive an incoming call, press and hold the button to end the call.

1.4 Using Headset

For hands-free conversation or listening to music, plug a headset to headset jack.

NOTE:

• **When using a headset, your ability to hear outside sounds may be limited. Do not use headset if it will endanger you.**
• **Do not set the volume to its maximum with a headset as it may damage your hearing.**
• **The following instructions are only provided with GSmart original headset:**

Types	Descriptions
Press the button on the headset	• When you receive an incoming call press the button to answering a call. If you are having a call conversation, press the button to hold, and press again to un-hold a call. •In music/video mode, press the button to play, and press again to stop or resume music/ video.
Press and hold the button on the	• If you are having a call conversation, press and hold

1.5 Turning the Phone On or Off

After installing the SIM card and charging the battery, you are now ready to turn on your phone.

To turn on your phone

Press and hold the power button until the phone vibrates.

To turn off your phone

1. Press and hold the power button for several seconds.
2. A pop-up window appears, and then, tap Power off.
3. Select OK to confirm.

To set your phone to Sleep mode

To set your phone to the sleep mode, press the power button briefly. It will turn the display off. To turn the display on, press the power button briefly again.

1.6 Lock / Unlock

When you turn on your phone or the display, you need to unlock the device. Slide the Lock Icon on screen to unlock the device. Slide the Sound Icon on screen to turn on / off the sound.
1.7 Notification LED:

Types	Descriptions
Solid red light	Battery is charging.
Solid green light	Battery is full.
Flashing red light	Battery is low.
Flashing green light	Notification.(New text message / Missed call/ New email).

1.8 Initial Settings

Please insert the SIM card. When you turn on your phone at the first time or you reset your phone, you need to follow the step below:

1. Tap the Android Robot icon to begin. In this step, you can tap Emergency dial to make an emergency call, or tap Change language to change the default language.
2. Tap Begin to learn how to use your phone, or tap Skip to skip this step.
3. In the screen of Google Account Settings, you can tap Create to create an account, tap Sign in to sign in with the Google account, or tap Skip to set up an account later.
4. In the screen of Use Google location, you can allow or disallow Google's location service to collect anonymous location data. You can also allow or disallow Google to use location for improved search results and other services. Then tap Next to set up date and time.
5. Finally, tap Next to finish the whole initial settings.

NOTE: Some features that need to connect to the Internet such as location-based services and auto-sync of your online accounts may incur extra data fees from your mobile operator. You can enable or disable them in your phone's settings as you go along later on.

1.9 Adjusting the Volume

To adjust the volume of ringtone, media, and alarm

1. Tap Application Drawer > Settings > Sound > volume.
2. Slide the volume bar to adjust the volume. Do either of the following:
a. Drag the slider towards the left to decrease the volume, or drag the slider towards to the right to increase the volume. Tap OK to save your settings.
b. Tap Application Drawer > Settings > Sound > Silent mode to set the phone to the silent mode.

NOTE: When the phone is set to the silent mode, all sounds are turned off except media and alarm.

1.10 Contacts

"Contacts" is your phonebook that lets you store names, phone numbers, e-mail addresses and other information. Contacts are stored in the phone memory.

Adding a Contact

1. Tap Application Drawer > Contacts.
2. Tap Menu > New contact, and then, the new contact window appears.
3. Tap each field to enter the contact information with the on-screen keyboard.

NOTE:

• To add picture, tap Picture field, and then, select a picture file.

4. Tap Done to save.

Searching for Contacts

On Contacts tab, do any of the following to easily search for contacts:
• Tap Menu > Search.
• Type the first few letters of the contact to search. The list is filtered as you type.

SIM Manager

SIM Manager is an SIM card management tool. If you don't have any contacts stored on your phone, you can import SIM contacts to your device.

1. Tap Application Drawer > SIM Manager.
2. Tap and hold the desired Contacts, the contacts submenu appears, you can call Contacts from your SIM Card, create/ delete Contacts on your SIM Card, transfer SIM Card Contacts to your Device.

Importing / Export Contacts

Import from SIM card.

1. Tap Application Drawer > Contacts.
2. On Contacts tab, tap Menu > Import/Export > SIM Manager.
3. Tap Menu > Export to phone, and select the contacts you want or select all and then tap Export.

Export to SD card

1. Tap Application Drawer > Contacts.
2. On Contacts tab, tap Menu > Import/Export > Export to SD card.
3. Tap OK to confirm.

Favorite Contacts

You can add the most frequently called contacts to the favorite contact list which helps you to access the contacts quickly and easily.

Add to Favorites

1. Tap Application Drawer > Contacts.
2. On Contacts tab, tap and hold the desired contact.
3. The contact submenu appears, and then, tap Add to favorites.
4. When you tap the contact, you will find a golden star appears next to the contact name. It means the contact is now in the favorites list.

Remove from Favorites

1. Tap Application Drawer > Contacts.
2. Tap Favorites tab, the favorites list is displayed.
3. Tap and hold the desired contact to display the submenu.
4. Tap Remove from favorites. The contact will be removed from the favorites list.

1.11 The Home Screen

On Home screen, you can quickly access common features and view notifications of missed calls, received messages, battery, and connection status. You can slide the home screen from the left side to the right side or from the right side to the left side to switch it.

Tap 🔲 to launch Application Drawer. Tap and hold it to review the five home screens at the same time.
Default Home Screen: Main functions.

**Quick launch Home Screen: :** Wi-Fi、Bluetooth、GPS、Data Synchronization、Brightness。
Icon	Function
🔲	Enable/disable Wi-Fi.
🔲	Enable/disable Bluetooth.
🔲	Enable/disable GPS.
🔲	Enable/disable Data Synchronization.
🔲	Tap to adjust brightness.
🔲	Tap to switch SIM1/SIM2.

Multimedia Home Screen: Camera 、 Camcorder 、 sound recorder 、 Gallery 、 Music 。

Self-defined Home Screen: There are five screens. You can add the shortcuts and widgets.
How to Navigate

Tap: You can tap the icon on the screen to get into the application.

Press and Hold: Press and hold the icon on the home screen to make it movable. Press and hold the icon on the application screen will make it add into home screen.

Slide: Slide the home screen from the left side to the right side or from the right side to the left side to change different pages.

Drag: After pressing and holding the icon on the home screen, you can arrange it. Drag it to anywhere you like on the screen or to the trash can.

Status Bar Icons

The Status bar icons indicate different types of information. Tap the status bar and scroll down to view notifications or view system information.

Shortcut Icons
Tap shortcut icons to activate the related functions. Tap and hold a shortcut icon to move it.

To add shortcuts
1. On Home Screen, tap Menu > Add > Shortcuts.
2. Tap Applications to display the list of applications.
3. Tap to add the items that you want to appear on Home Screen.

To delete shortcuts
1. Tap and hold the desired shortcut icon. The icon enlarges, and Trash Can Icon appears at the bottom of Home Screen.
2. Drag the shortcut icon to Trash Can Icon to delete it.

Using Widgets
You may add and customize the Widgets on Home Screen as you like.
To add widgets
1. On Home Screen, tap Menu > Add > Widgets.
2. A list of all available widgets is displayed. Tap to select the widget you want to appear on Home Screen.

To delete widgets
1. Tap and hold the desired widget icon. The icon enlarges, and the Trash Can Icon appears at the bottom of the Home Screen.
2. Drag the widget icon to the Trash Can Icon to delete it.

Setting the wallpaper
You can customize the wallpaper of your Home Screen with default wallpaper or with pictures taken with your phone.

Set wallpaper from Gallery
1. On Home Screen, tap Menu > Wallpaper.
2. Select a picture from Gallery.
3. You will see thumbnail images of all pictures. Tap to select the picture you want to use as your wallpaper.
4. Drag your finger to select the crop area.
5. Tap Save and the cropped image appears as your wallpaper on Home screen.

Set wallpaper from Live wallpapers or Wallpapers
1. On Home Screen, tap Menu > Wallpaper.
2. Tap Live wallpapers or Wallpapers.
3. All system wallpapers are displayed. Tap to preview the wallpaper.
4. Tap Set wallpaper to apply your selection.

Folders
To add / delete Folder
You can also add/delete folders to your Home
screen.
1. On Home Screen, tap Menu >Add > Folders.
2. Tap to select the desired folder you want to
   appear on Home Screen.
3. Tap and hold the desired folder ,the
   icon enlarges, and the Trash Can Icon appears
   at the bottom of the Home Screen. Drag the
   widget icon to the Trash Can Icon to delete it.
2. Phone Functions & Input

To open Phone screen, do any of the following:
• Tap Application Drawer > Phone.
• Press Talk Key.

• Make a phone call by SIM1, press 📞1

• Make a phone call by SIM2, press 📞2

2.1 Voice Calls

Making a call
To make a call from the Phone screen
1. Open the Phone screen.
2. Tap the phone number on the keypad.

NOTE: Tap ⌫ to erase a wrong number.

Tap and hold ⌫ to erase the entire number.
3. Tap phone number, and then, press Talk
Key 📞 to dial.
4. To end the call, press End Key 📵.

To make a call from Contacts
1. Tap Application Drawer > Contacts.
2. Tap the desired contact.
3. Tap Call mobile, Call work, or Call home. Or,
   press Talk Key to dial the default number
   directly.

To make emergency calls
Enter the international emergency number 112,
and then, press Talk Key.

If your device has entered Device Lock Mode, you
have to un-lock the device before you make an
emergency call.

To make international calls
1. Open the Phone screen.
2. Tap and hold 0 until the international prefix
   code "+" is displayed.
3. Enter the country code, area code, and the
   phone number.
4. Tap the phone number or press Talk Key to
   dial.

Answering a call
When you receive an incoming call:
• The phone rings if the ring volume is turned on.
• A notification message appears on the screen.

To accept or reject an incoming call
• To accept a call, press Talk Key.

• To reject a call, press End Key.

To put a call on hold

If you are having a call conversation and there is another incoming call, tap Menu > Hold to put the first call on hold. To un-hold a call, tap Menu > Hold again.

To switch between calls

If you are having a call conversation, and there is another incoming call, tapping "Hold current call & answer" to put the first call on hold. Tap Menu > Swap calls to switch between calls.

To set up conference calls

1. When you are already having a call conversation, tap Menu > Add call to enter the second number you wish to call, and then, press Talk Key to dial the number.
2. When the third party answers your call, tap Menu > Merge calls to set up the conference calls.

NOTE: Conference call is a network service. Check with your network provider for the availability of this function.

To manage other voice call features

• Tap Menu > Speaker to activate the speakerphone, or tap Menu > Speaker again to deactivate the speakerphone.
• Tap Menu > Mute to mute the microphone, or tap Menu > Mute again to un-mute the microphone.
Ending a call

To end a call, tap Menu > End call**.**

2.2 Using On-Screen Keyboard

On-screen keyboard appears in portrait mode when an application requires text input, such as

messaging, and writing e-mails. The keyboard input method is activated by default.

• Tap and hold the text area, the pop-up window will ask you to select the input methods.

Using on-screen keyboard

• Use the keys on the on-screen keyboard as you do on computer keyboard.
• Tap the keys to enter the characters.
• To toggle between upper and lower case letter display, tap ⇧.
• To display the numeric and symbols keyboard, tap ?123.

Setting the Input Method

Your phone supports several text input methods, and you can select your preferred method.

1. Tap Application Drawer > Settings > Language

& keyboard.

2. In Text settings, you will see a list of the input methods. Select and check the options you prefer.

Android keyboard:

Android keyboard settings

• **Vibrate on keypress:** Phone vibrates when user presses any key on the on-screen keyboard.

• **Sound on keypress:** Phone sounds when user presses any key on the on-screen keyboard.

• **Vibration on keypress:** Turn on/off.

• **Keyboard types:** QWERTY or Numeric Keyboard.

• **Space after English words automatically:** Turn on/ Turn off.

• **Select languages:** Select language for Guobi

input method.

• **About:** GuoBi Input Method.

Icon	Function
En	Switch input methods.
abc	Tap to smart English input method.
✎	Tap to handwriting input mode.
⇧	Tap to enter capital letters.
▤°	Tap to Guobi input method settings.
↵	Tap to next text zone.
123	Tap to the numeric keyboard.
Sym	Tap to symbols keyboard.

3. Email & Messaging

Use Messaging to access text and MMS
messages. Use Email to send and receive e-mail
messages via your Internet e-mail accounts.

3.1 Creating and sending a text message

Your phone offers several ways to create and
send a new text message.

From Messaging screen
1. Tap Application Drawer > Messaging.
2. Tap New message.
3. In the "To" field, enter the recipient's
   phone number.
4. Type your message in the "Type to compose"
   field.
5. Tap Send to send your message. You can
   select SIM1 or SIM2 (If SIM2 inserted).

From Contacts
1. Tap Application Drawer > Contacts.
2. Tap a contact to display the contact
   information.
3. Tap the Text Icon 😊.
4. Compose your message.
5. Tap Send to send your message. You can
   select SIM1 or SIM2 (If SIM2 inserted).

From Call log
1. Tap Application Drawer > Contacts.
2. Tap the Call log tab to view all call history.
3. Tap a call from the Call log.
4. Tap Send text message.
5. Compose your message.
6. Tap Send to send your message. You can
   select SIM1 or SIM2 (If SIM2 inserted).

**Note: If you exit Messaging before sending,
unsent message will be automatically saved
as a draft.**

To request message delivery notification
1. In Messaging, tap Menu > Settings> Text
message(SMS) settings/Multimedia
message(MMS) settings> Delivery reports.
2. Check Delivery reports.

Receiving and Managing Messages
When you send and receive messages from a
contact, these messages are grouped as a
message thread. A message thread looks like an
exchanged conversation.

To reply to a text message
1. Tap Application Drawer > Messaging.
2. Tap the contact who send message to you.
3. Tap "Type to compose" to enter your message.
4. Tap Send to send your message.

To forward a text message
1. Tap Application Drawer > Messaging.
2. Tap the contact who send message to you to
   view a message thread.
3. Tap and hold a message to display the
   message options.
4. Tap Forward.
5. In the "To" field, enter the recipient's phone
   number.
6. Tap Send to send your message. You can
   select SIM1 or SIM2 (If SIM2 inserted).

To delete a message within a thread
1. Tap Application Drawer > Messaging.
2. Tap the contact who send message to you.
3. Tap and hold the message you want to delete.

4. Tap Delete message.

To copy message text

You can use this function to copy the text from a message to a new message you are composing.
1. Tap Application Drawer > Messaging.
2. Tap the contact who send message to you to view a message thread.
3. Tap and hold a message to display the message options.
4. Tap Copy message text.
5. Go to New Message.
6. Tap and hold "Type to compose".
7. Tap Paste to paste the copied texts to your new message.

3.2 Multimedia Message

A Multimedia message or MMS can contain letters, an image, an audio, or a video file.

Creating and sending an MMS message

Your phone offers several ways to create and send a MMS message.

From the Messaging screen
1. Tap Application Drawer > Messaging.
2. Tap New Message.
3. Tap Menu > Add subject. The message converts to a MMS message automatically.
4. In the "To" field, enter the recipient's phone number.
5. Enter the Subject.
6. To insert a picture or video file, tap Menu > Attach.
7. To insert text, tap "Type to compose", and then, enter your message with the on-screen keyboard.
8. Tap Send to send your message.

From Contacts
1. Tap Application Drawer > Contacts.
2. Tap a contact.
3. Tap the Text Icon. The message window is displayed.
4. Tap Menu > Add subject to convert to MMS message.
5. Tap Subject to enter the subject.
6. To insert a picture or video file, tap Menu > Attach.
7. To insert text, tap "Type to compose", and then, enter your message with the on-screen keyboard.
8. Tap Send to send your message.

From the Call log
1. Tap Application Drawer > Contacts > Call log tab.
2. Tap a call in the list of Call log tab.
3. Tap Send text message.
4. Tap Menu > Add subject to convert to MMS message.
5. Tap Subject to enter the subject.
6. To insert a picture or video file, tap Menu > Attach.
7. To insert text, tap "Type to compose", and then, enter your message with the on-screen keyboard.
8. Tap Send to send your message.

3.3 Voice Message

Your phone supports sending of Voice message.

To create a voice message
1. Tap Application Drawer > Messaging.
2. Tap New Message.
3. Tap Menu > Attach > Record audio.
4. Tap to record an audio file.

5. Tap [ ] to stop recording.
6. Tap [ ] to listen to your recording.
7. Tap Use this recording to proceed, or tap Discard, and return to the compose message screen.
8. Tap Play to listen to your recording again, Tap Replace to replace the file, or tap Remove to delete your recording from the MMS message.
9. Enter the mobile phone number in the "To" field.
10. To insert text, tap "Type to compose", and then, enter your message with the on-screen keyboard.
11. Tap Send to send your message.

3.4 E-mail Accounts

Your phone can send and receive e-mails just as you do with a computer. Your phone supports Internet e-mail: e-mail account provided by an Internet Service Provider (ISP) or web-based e-mail, such as Gmail, Hotmail, Yahoo! Mail, etc.

Setting up an Internet e-mail account
1. Tap Application Drawer > Email.
2. Enter your E-mail address and Password. Tap Next.
3. The phone will retrieve the e-mail settings automatically.
• If the e-mail settings are pre-configured, the E-mail setup wizard displays a successful message.
• If the e-mail settings are not found, Manual setup is in process automatically. You can follow the instructions to complete the settings.
4. Enter Account display name and Your Name, and then, tap Done.

NOTE: The Account display name is the name shown on the Email screen.

To open Email
Tap Application Drawer, and then, tap Email to view your e-mails.

To select an account
1. Tap Application Drawer > Email.
2. Tap Menu > Accounts to view all e-mail accounts. If you set up two more e-mail accounts in the beginning, Account List will appear directly after you tap Application Drawer > Email.
3. Tap the e-mail account you want to access.

To configure e-mail settings
1. On your accounts screen, tap to select an e-mail account.
2. Tap Menu > Account settings to adjust the settings of your e-mail accounts.

3.5 Using E-mail

Composing and sending an E-mail
1. Tap Application Drawer > Email, and then, tap an e-mail account.
2. Tap Menu > Compose.
3. In the "To" field, enter the recipient's e-mail address.
4. Enter the Subject.
5. Compose Mail.
6. Tap Send to send your e-mail.

Sending an E-mail from Contacts
You can send an e-mail to a contact with an e-mail address stored in Contacts.
1. Tap Application Drawer > Contacts.
2. Tap a name to open contact.
3. Tap Email home. Tap Email in the submenu.
4. Enter the Subject and compose Mail.
5. Tap Send to send your e-mail.

Adding attachments to an e-mail message
Before sending your message, tap Menu > Add
attachment, and then, select the attachment you
want to attach.

Receiving e-mails
E-mails are received in your Inbox automatically
when your phone connects to wireless networks.

Reading and replying to e-mails
The Inbox displays the e-mail headers. When you
open the e-mail, it shows only a part of the
message, unless it is a very short message.
Download the e-mail to view the complete
content.

To reply or forward an e-mail
1. Open an e-mail.
2. Do any of the following:
• Tap Reply or Reply all to reply the e-mail.
• Tap Menu > Forward. Then enter the recipient
  in the "To" field.
3. Compose Mail.
4. Tap Send to send your e-mail.

Managing E-mail folders
To delete an e-mail
1. Tap Application Drawer > Email, and then, tap
   an e-mail account (if you have two more e-mail
   accounts).
2. Tap Inbox to view the inbox e-mails.
3. Tap and hold an e-mail to launch a
   submenu, and then, tap Delete to delete the
   e-mail.

To move between messaging accounts
If you are viewing the messaging list screen of
one account and you want to view the list of
another account, tap Menu > Accounts, and then,
tap the account you want to view.

Customizing Account settings
You can configure the general settings of your
e-mail account such as Account name, Email
check frequency, and Default account, etc.

To set up your account name
1. Tap an e-mail account (if you have two more
   e-mail accounts).
2. Tap Menu > Account settings > Account name
   to change the account name.
3. Tap OK to confirm.

To set up the e-mail check frequency
1. Tap an e-mail account (if you have two more
   e-mail accounts).
2. Tap Menu > Account settings > Email check
   frequency. You can set the phone to
   automatically check for new e-mail every 5
   minutes, every 10 minutes, every 15 minutes,
   every 30 minutes, and every hour.

To set up default account
1. Tap an e-mail account.
2. Tap Menu > Account settings > Default account
   to send e-mail from this account by default.

To delete an e-mail account
1. Tap Application Drawer > Email.
2. Tap and hold the account to launch the
   submenu, and then, tap Remove account.
3. Tap OK to confirm.

4. Using the Internet

4.1 Connecting to the Internet

Your phone connects to the Internet via:
- Wi-Fi
- GPRS / EDGE / 3G / 3.5G

Note: If you want to connect to the Internet automatically, you can tap Application Drawer > Settings > Wireless & networks > Mobile networks > Data enabled, to mark Data enabled. When you connect to the Internet, it may charge you.
Wi-Fi
Your device can connect to the detected network through Wi-Fi.

1. Tap Application Drawer > Settings to access Wireless & networks.
2. Tap to check the Wi-Fi function and turn Wi-Fi on or off.

To connect to a Wi-Fi network
1. Turn Wi-Fi on.
2. Tap Wi-Fi settings. The phone scans for Wi-Fi signals.
3. Detected networks are displayed below. Tap a network connection, and then, tap Connect.

4. If you select an unsecured network, the connection is automatically established. Otherwise, proceed to the next step.
5. To connect to a secured connection, you will be prompted for the network key. Enter the key, and then, tap Connect.

When Wi-Fi is connected, the connection icon is displayed on the status bar.
To add Wi-Fi network
1. Tap Application Drawer > Settings to access Wireless & networks.
2. Tap Wi-Fi settings.
3. In Wi-Fi networks, tap Add Wi-Fi network. A new window is displayed.
4. Follow the on-screen instructions and enter necessary information, and then, tap Save to store settings.

To configure Wi-Fi settings
1. Tap Application Drawer > Settings to access Wireless & networks.
2. Tap Wi-Fi Settings.
3. Tap Menu > Advanced.
Note: If you use static IP, enter the IP settings as required.
4. In IP settings, Enter the information for IP address, Gateway, Netmask, and DNS. Tap OK to save your settings.

Cellular Data Network
Check the availability of these connections with your network service provider and obtain the following information:
- Access Point Name
- Proxy
- Port
- User name

• Password
